

## The symptoms

Wind Turbine Syndrome (WTS) is the clinical name [Dr. Nina Pierpont](#) has given to the constellation of symptoms experienced by many (not all) People who find themselves living near industrial wind turbines.

- **sleep disturbance**
- **headache**
- **tinnitus (pronounced “tin-uh-tus”: ringing or buzzing in the ears)**
- **ear pressure**
- **dizziness (a general term that includes vertigo, lightheadedness, sensation of almost fainting, etc.)**
- **vertigo (clinically, vertigo refers to the sensation of spinning, or the room moving)**
- **nausea**
- **visual blurring**
- **tachycardia (rapid heart rate)**
- **irritability**
- **problems with concentration and memory**
- **panic episodes associated with sensations of internal pulsation or quivering, which arise while awake or asleep**

As wind turbines spring up like mushrooms around people’s homes, Wind Turbine Syndrome has become an industrial plague. (See victims’ Diaries & Reports and [Videos](#)). Nina Pierpont has been researching this “plague” for the past five years, and in November 2009 she published her results, *Wind Turbine Syndrome: A Report on a Natural Experiment* (Santa Fe, NM: K-Selected Books, 2009). Click on [Read Peer Reviews](#) to read the referee reports (all by medical school and university faculty). For purchase information, see [Buy the book](#). For an in-depth radio interview with Dr. Pierpont, wherein she explains what’s going on with WTS, [click here](#). (With thanks to Radio [CFCO](#), Ontario, Canada, 2-28-08, “Ask the Health Expert.” Be sure your speakers are turned up.)
